公司簡介

國家發展委員會為行政院重要政策規劃機關，擔負國家整體發展之規劃、設計、協調、審議及管考等任務。面對急遽變遷的國內外情勢，國家發展委員會將從國家永續發展資源統籌規劃的視野與高度，協調推動經濟、社會、產業、人力、國土、政府治理等重大政策，開創國家發展新格局。

產品介紹

為呼應國際倡議，接軌淨零趨勢所帶來的挑戰與商機，行政院國家永續發展委員會督導協調國家發展委員會、經濟部、環境部、國科會、交通部及內政部等相關部會，共同發布「臺灣2050淨零排放路徑」，以四大轉型策略及兩大基礎為架構，提出「十二項關鍵戰略」行動方案，以推動我國淨零轉型。同時，展出永續發展績效卓越單位之作品，展示我國推動永續發展作為。

Company Website：<https://www.ndc.gov.tw/>

Company Summary

The National Development Council (NDC) acts as the main policy-planning agency of the Executive Yuan, and is responsible for planning, designing, coordinating, reviewing, and evaluating the nation's overall development. The NDC endeavors to open up new horizons for national development in tune with the rapid changes occurring at home and abroad, and acts from the perspective of the overall planning of the sustainable use of resources for national development, as well as coordinating the implementation of major policies for economic, social, industrial, manpower, land and political governance.

Product Summary

In response to international initiatives on "2050 Net-Zero Emissions", as well as the challenges and business opportunities that related to net-zero transition, The Executive Yuan's National Council for Sustainable Development, led National Development Council, Ministry of Economic Affairs, Ministry of Environment, National Science and Technology Council, Ministry of Transportation and Communications, Ministry of the Interior and other central government agencies, announced the "Taiwan's Pathway to Net-Zero Emissions in 2050". On the basis of "four transition strategies" and "two governance foundations", Taiwan kicked off the "12 Key Strategies" action plan to implement Taiwan's net-zero transitions. In the meantime, highlight the endeavors of outstanding organizations dedicated to attaining excellence in sustainable development, while emphasizing our nation's commitment to advancing sustainability.

 經濟部
Ministry of Economic Affairs

公司簡介

經濟部主管全國經濟建設及發展，業務範疇從產業創新升級，到再生能源的推動，從商業與服務業推展，到新創及中小企業的輔導；從區域經濟整合與國際招商布局，到智慧財產權相關法規的訂定；從水庫河川保育監測，到油、電、糖、水等民生需求管理等。

經濟部為推動2050淨零轉型，特別成立「淨零推動會報」，作為跨單位整合平台，加速能源及產業雙軸轉型之淨零政策規劃及相關法規措施研議。在能源供給面上積極促動能源系統低碳化，發展前瞻能源及氫能；在產業部門，依循以大帶小模式並由國營事業以身作則，協助產業強化綠色供應鏈韌性；並依產業別推動製程改善、能源轉換與循環經濟等減碳策略，加速整體產業邁向淨零目標。

產品介紹

全球2050淨零排放將改寫世界經濟版圖，經濟部展館以「淨零未來新經濟」為主軸，展示能源與產業雙軸轉型願景。臺灣具備厚實的半導體與資通訊技術優勢，在這樣的基礎上及政府推動下，逐步打造我國綠能產業生態系統，從上游材料研發、中間設備製造到下游系統整合，再經由示範場域測試驗證，無論是太陽光電、離岸風電等皆已形塑完整的產業鏈。另外，經濟部持續投入輔導補助資源，多方協助企業導入智慧化、數位化、低碳化方案，在製程轉換、能源管理或循環經濟等面向上，加速產業高值化進程，建立綠色供應鏈。此次經濟部展館面向全世界展示多樣能源及產業轉型之低碳技術、綠色產品以及政策推動成果，提供淨零新解方，擴大國際合作的機會。

台灣中油股份有限公司

公司電話：(02)8789-8989

公司網址：<https://www.cpc.com.tw/>

公司簡介

台灣中油成立已逾75年，除肩負國營事業穩定油氣價格等責任外，亦戮力供應國內所需油氣產品，協助石化中下游產業發展，並致力環境品質的提升，善盡企業社會責任。在淨零排放風潮下，各國減碳意識抬頭進而驅動能源結構改變，國際企業同步響應這股減碳趨勢，訂定旗下業務、產品或供應鏈達成零碳排放之進程，能源與石化業界亦掀起一股轉型浪潮。台灣中油已規劃優油、減碳、潔能三大主軸進行轉型，持續掌握低碳趨勢，穩健推動減碳與優油業務，發展再生能源與負碳排技術，與所有利害關係人共同攜手拓展營運新版圖，邁向淨零永續的新世代。

產品介紹

地熱能源為利用地球核心深處產生的熱產生熱能或是電力，為一種乾淨的再生能源，相比於具有間歇性的太陽能或是風能之再生能源，地熱能能夠穩定供電作為基載電力。在火山型地熱能源探勘中，地熱鑽井所取出的岩心樣本可藉由多種分析方法得到地下資訊，例如溫度、流體酸鹼值、儲集層或是蓋層。本次展覽中展示數個不同深度的岩心柱樣本，其岩性皆為安山岩質，並依產狀區分為火山角礫岩或火山熔岩流，再藉由分析得到其物理和化學特性，進一步評估其地熱潛能。此外，岩心樣本含有方解石脈的出現，指示其深度區間流體為中性或是弱酸性，證實台灣北部大屯山火山型地熱地下存在弱酸性儲集層之可能性。

CPC Corporation, Taiwan

Company Telephone：+886-2-8789-8989

Company Website：<https://www.cpc.com.tw/>

Company Summary

It has been 75 years since the establishment of CPC. In addition to its responsibility to stabilize oil and gas prices as a state-owned business, CPC also strives to adequately supply domestic oil and gas products, assist the development of petrochemical midstream and downstream industries. In addition, CPC is committed to improving environmental quality, fulfilling corporate social responsibility, and harmonizing social relations. In conformity with the net zero emissions trend, each country strengthens carbon reduction consciousness, which drives a change in energy demand structure. Worldwide enterprises are responding to this carbon reduction trend in a synchronous manner. They define the roadmap of their operations, products or supply chains towards zero carbon emissions. With the trend, the energy and petrochemical industries also launch a wave of transformation. Ranking at the first place in the state-owned petrochemical and energy corporation, CPC has formulated its business transformation in three aspects, "High-Value Petrochemical", "Low-Carbon Emission" and "Lean-Renewable Energy". CPC continues to follow the low-carbon trend by promoting the business of carbon reduction and excellent oil, developing renewable energy and negative carbon emission technologies, and working with all stakeholders to expand the business scope into a new era of net zero emissions and sustainable.

Product Summary

Geothermal energy is a clean renewable resource that generated heat deep in the core of the Earth to produce thermal energy or electricity. Compared with intermittent renewable energy sources such as solar energy or wind power energy, geothermal energy can provide stable energy as base load power. During the exploration of volcanic geothermal energy, core samples taken from drilling wells can be used to obtain plenty of underground information, such as temperature, fluid pH, reservoirs or caprocks through a variety of analysis methods. In this exhibition, we display several core samples from various depths, all characterized by andesitic rock. They are further classified into volcanic breccia or volcanic lava flows based on their occurrence. Through analysis of their physical and chemical properties, we aim to assess their geothermal potential. Furthermore, the displayed core samples exhibit the presence of calcite veins, indicating that the fluids within the depth interval are neutral or weak acidic. It is confirmed that there might be a weak acidic reservoir in the subsurface of the volcanic geothermal field in Tatum volcanic group of northern Taiwan.

台灣電力股份有限公司

公司電話：(02)2365-1234

公司網址：<https://www.taipower.com.tw/tc/index.aspx>

公司簡介

台電公司成立於 1946 年 5 月 1 日，經營範疇涵蓋發電、輸配電及售電業務。台電身為國營公用事業，肩負穩定供電、友善環境與維持合理成本電價之使命，以提供企業與民生發展所需基礎條件。著眼於國際電業永續趨勢及未來電力市場發展，台電於 2016 年 1 月成立水火力發電、核能發電、輸供電、配售電等四大事業部，透過事業部制推動，總管理處與各事業部採政策集中化與管理分權化運作模式，由機關體轉向高效率企業體，期望成為卓越且值得信賴的世界級電力事業集團，為臺灣企業與個人提供最高品質之服務。

產品介紹

因應全球能源轉型及淨零排放趨勢，台電依據國家 2050 淨零排放路徑目標及經濟部「先低碳，後零碳」策略架構，以「電源端、電網端、需求端」三大面向推動電力淨零排放策略。電源端配合政府能源策略，擴大綠能開發，推動燃氣橋接並積極發展前瞻能源技術，循序邁向零碳電源供應結構；電源端推動強韌化、智慧化及儲能化，以確保再生能源併網最大化及穩定供電；需求端推廣節約用電及精進需量反應，改變用戶行為達成節電及供需穩定。

Taiwan Power Company

Company Telephone：+886-2-2365-1234

Company Website：<https://www.taipower.com.tw/tc/index.aspx>

Company Summary

Established on May 1, 1946, Taipower operates in generation, transmission, distribution, and the sale of electricity. As a state-owned utility, Taipower carries the mission of ensuring stable power supply, promoting environmental sustainability, and maintaining reasonable electricity prices to support the foundational needs of both businesses and the public. In response to the recent global trends toward sustainability and the development of future electricity markets, Taipower has promoted an organizational transformation. In January 2016, Taipower established four business divisions: the Power Generation Division, the Nuclear Power Division, the Transmission System Division, and the Distribution and Service Division, in an effort to transform from a government agency into a highly efficient enterprise. In the future, Taipower will strive to become a prestigious and world-class power utility group that provides customers with services of the highest quality.

Product Summary

In response to the global energy transition and the trend towards net-zero emissions, Taipower is advancing its strategy for achieving net-zero emissions in electricity through three major aspects: the power supply side, the power grid side, and the demand side in accordance with the national 2050 net-zero emissions roadmap and the Ministry of Economic Affairs' "Low Carbon First, Zero Carbon Later" strategy framework. On the power supply side, aligning with the government's energy strategy, there is a focus on expanding renewable capacity, using gas-fired power as the transitional energy, and actively pursuing cutting-edge energy technologies, progressively moving towards a zero-carbon power supply structure. The power grid side involves promoting resilience, intelligence, and energy storage to ensure the maximization and stability of renewable energy integration into the power supply. On the demand side, efforts include promoting electricity conservation, improving demand response, and influencing user behavior to achieve power savings and supply-demand stability.

台灣糖業股份有限公司

公司電話：+886-6-337-8888

公司網址：<https://www.taisugar.com.tw>

公司簡介

台糖公司於1946年創立，是臺灣砂糖產銷的領導品牌，擁有大面積土地及豐富的農業種植與加工經驗。台糖在糖業、養豬及蝴蝶蘭方面都具有核心技術，並從傳統農業加工業轉型為涵蓋砂糖、生物科技、精緻農業、油品、畜殖、休閒遊憩、商品行銷等7個事業部之綜合事業體。台糖利用土地優勢及畜殖資源，設置屋頂型、地面型及水面型等太陽能發電場域，並將豬糞尿轉為沼氣發電，緊隨全球「淨零排放」與「循環經濟」的趨勢進行轉型，持續領航產業升級、善盡社會責任，作為推動國家進步的堅實後盾與關鍵力量，成為亞太地區健康及綠色產業的標竿企業。

產品介紹

台糖公司積極響應2050淨零排放政策，承擔低碳轉型之企業社會責任，近年來投入發展新農業、循環經濟及綠色能源，如太陽能、沼氣發電、新式豬場改建、智慧綠能循環住宅等。台糖亦協助國家推動低碳運具政策，於加油站、停車場、飯店及休憩場所建置公共充電樁。此外，砂糖事業部小港廠燃油鍋爐於2022年改換燃氣鍋爐，及台糖推動森林碳匯和土壤碳匯等減碳/負碳措施，俱顯現台糖公司在實踐循環經濟與推動淨零轉型的努力。

Company Summary

Founded in 1946, Taiwan Sugar Corporation (TSC) is a leading brand in Taiwan's sugar production and sales. TSC owns vast lands and rich experience in agricultural cultivation and processing, and has core technologies in sugar industry, pig farming, and Phalaenopsis orchids. TSC has transitioned from a traditional agricultural processing industry to a comprehensive business entity with seven new branches: Sugar, Biotechnology, Agriculture, Petroleum, Livestock, Leisure, and Marketing Business Divisions. Taking advantage of its land properties and livestock resource, TSC has set up solar photovoltaic systems (roof-top, ground based, and floating) at its business locations, and has also converted pig manure into biogas for power generation. Following the global trend of "Net-Zero Emissions" and "Circular Economy", TSC has been transforming and continuously leading industrial upgrades, fulfilling its social responsibilities, and continuing to be a solid backing and key force in driving the nation's progress, as the benchmark for health and green industry in the Asia-Pacific region.

Product Summary

Taiwan Sugar Corporation (TSC) is actively responding to the "2050 Net-Zero Emissions" policy, taking on the corporate social responsibility of low-carbon transition. In recent years, TSC have invested in the development of New Agriculture, Circular Economy, and green energy, such as solar power, biogas power generation, renovation of modern pig farms, and smart green energy circular houses. TSC also assists the country in promoting low-carbon vehicle policies by setting up public charging piles at its gas stations, parking lots, hotels, and rest areas. In addition, the Hsiao-Kang Factory of the Sugar Business Division replaced its oil-fired boiler with a gas-fired boiler in 2022, and TSC develops forest carbon sinks and soil carbon sinks to reduce carbon emission and sequester carbon, altogether highlighting TSC's efforts in practicing Circular Economy and promoting Net-Zero transition.

Company Summary

The National Science and Technology Council (NSTC) is tasked to plan the nation's frontier S&T, promote the development of S&T, apply basic research to industrial application, and coordinate the allocation of resources across agencies and fields. The NSTC will also formulate forward-looking S&T policy, support basic research, establish science parks, and promote innovation and entrepreneurship. These four missions will allow Taiwan to achieve critical milestones in innovation, inclusion, and sustainability by 2030.

Product Summary

The exhibition theme of the NSTC focuses on five main areas for the development of net-zero-related science and technology including 'sustainable, future-oriented energy,' 'low-carbon and carbon reduction,' 'carbon negative,' 'circular economy,' 'humanities and social sciences.' The goal of developing these five areas is to achieve net-zero emissions by 2050. Academia Sinica released the "Strategic Recommendations for Science and Technology Actions towards Net Zero Emission in Taiwan" in November 2022, proposing that the country's transition to net-zero emissions hinges on the development of zero-carbon electricity. It urgently suggests the advancement of net-zero technologies, including Methane Pyrolysis to Power, Geothermal Energy, Marine Energy (Kuroshio Current), High-Efficiency Solar Cells, and Biomass Carbon Sink.

Taiwan Business Bank

Company Telephone：+886-2-25597171

Company Website：www.tbb.com.tw

Company Summary

The forerunners of the Taiwan Business Bank were two private savings organizations, one established in Taipei in June of 1915 and the other in Tainan in July of the same year, following the traditional practice of forming cooperatives. To cope with the liberalized and internationalized financial environment, and to conform to the government's policy of privatizing state-owned enterprises, the TBB was transformed into a private bank on Jan. 22, 1998. The Bank's domestic branch network covers the whole island, and also operates 9 global networks, including Hong Kong Branch in Hong Kong, Los Angeles Branch and New York Branch in the US, Sydney Branch and Brisbane Branch in Australia, Shanghai Branch and Wuhan Branch in China and Tokyo Branch in Japan, Yangon Representative Office in Myanmar.

產品介紹

臺灣銀行透過簽署赤道原則、TCFD等國際永續倡議，宣示接軌國際與落實永續經營的決心，並藉由環境管理、溫室氣體減量、綠色採購、興建綠建築行舍等，降低自身營運碳排。同時，將環境和社會風險審查機制融入經營管理策略，逐案對授信戶進行評估，將授信條件與其ESG 績效連結，運用金融影響力，引導客戶與本行攜手共創綠色永續價值。未來將廣續以實際行動降低自身營運及金融本業對環境的衝擊，助力國家達成2050淨零排放目標。

Bank of Taiwan

Company Telephone：+886-2-23494567

Company Website：<https://www.bot.com.tw/en/personal-banking>

Company Summary

As a national bank wholly owned by the Taiwan Government, Bank of Taiwan (BOT) has long adhered to a prudent business philosophy and implemented a "comprehensive compliance" system. We have won wide acclaim through our outstanding business performance and quality services, and also become the public's most trusted bank.

Our corporate vision has been defined as: "A leading bank with global presence". This vision encompasses a strategy whereby BOT strongly supports the country in moving steadfastly toward a strong and stable economy by providing enterprises with robust and comprehensive financial services. BOT has continued to pursue innovations in FinTech to enhance and improve its financial services capabilities. In an effort to speed up and widen its global reach, BOT has collaborated with leading international banks and expanded its overseas networks to five major continents. BOT also strives to fulfill its commitments to sustainable development through the three major sustainability strategies of "We care for the people", "We strengthen the resilience for the society" and "We drive for the net-zero future".

Product Summary

BOT not only proclaims its resolution in keeping abreast of international trends in realizing corporate sustainability by signing the Equator Principles (EP) and Task Force on Climate-Related Financial Disclosures (TCFD), but also endeavors to lower carbon emissions through environmental management, GHG reduction, green procurement, and green buildings in a bid to contribute to environmental sustainability. We have incorporated our environmental and social risk assessment mechanisms into our management strategies, conducted an ESG evaluation of each corporate credit customer and linked credit conditions to each customer's ESG performance, thus taking full advantage of BOT's role in the financial markets to guide customers to join with the Bank in together creating green and sustainable value, and implementing sustainable finance.

Looking ahead, BOT will continue to reduce the environmental impact of its operations and the finance sector by taking action, thereby becoming a promoter of sustainability to help Taiwan achieve the net zero target by 2050.

China Development Financial Holding Corporation

Company Telephone : +886-2-2763-8800

Company Website : <https://www.cdfholding.com/zh-tw/>

Company Summary

China Development Financial Holding Corporation is composed of five major subsidiaries: China Development Capital, KGI Securities, KGI Bank, KGI Life, and KGI Securities Investment Trust. In April 2021, it became the first financial holding company in Taiwan to commit to achieving net-zero carbon emissions for its total portfolio by 2045, expanding its influence through financial investment activities.

Product Summary

CDF has five major subsidiaries, including life insurance, banking, securities, investment trusts, and private equity/asset management. Through diversified platforms, the group continues to promote steady development and provide sustainable financial solutions for stakeholders. We pioneered the use of facial recognition technology in mobile insurance application processes, which breaks through time and space limitations and reduces resource consumption. In May 2022, we launched the "Green Deposit" project, which aims to allocate funds to green financing and sustainable linked loans. We also provide investors with the opportunity to purchase overseas structured products through our securities platform. Our partners will plant a tree through professional institutions to promote afforestation and combat global warming, creating ecological diversity. In addition, our group has the most ESG-compliant bond-type funds (including ETFs) issued fund company. As a pioneer in sustainable investment in Taiwan's private equity funds, we support investments in circular economy industries such as renewable energy and energy storage equipment, waste treatment, sewage treatment, and low-carbon data centers. We also created Taiwan's first cross-border green energy investment platform to assist the supply chain and small and medium-sized enterprises in upgrading their energy layouts and constructing low-carbon and energy-saving supply chains.

IBF Financial Holdings

Company Telephone：+886-2-7752-0088

Company Website: <https://www.ibf.com.tw/waterland/index-eng.asp>

Company Summary

IBF Financial Holdings is currently the only financial holding company established by a bill finance company in Taiwan. It operates as a niche-focused investment bank, comprising investments in related businesses such as bills, securities, securities investment trust and consulting, futures, and venture capital. Primarily concentrating on wholesale and corporate financial services, the IBF Group recently diversified its portfolio by investing in Rakuten Bank, Taiwan's first internet-only bank, entering the retail financial market as well. Over the past 47 years, the subsidiary International Bills Finance has been a strong pillar of the domestic monetary market. Following the group's expansion into the securities business, it further integrated the currency market with capital market operations, leveraging operational advantages in direct financial services. Looking ahead, the IBF Group aims to deepen the understanding of the ever-changing market, expand its business scope, bolster information capabilities, and actively earn customer trust with a sincere attitude, collectively creating mutually beneficial outcomes.

Product Summary

The IBF Group has been involved in green energy financing since 2013. Its subsidiary, International Bills Finance, channels surplus funds from the monetary market into low-carbon industries through guarantee and underwriting services for commercial paper, achieving sustainable development and zero net emissions goals. As a pioneer in green finance, it has won the Top Solar Awards for four consecutive years. Apart from engaging in various types of solar photovoltaic projects, International Bills Finance also offers customized and diversified financing options tailored for different businesses and established a SOP for financing projects covering various renewable energy sectors such as energy storage, geothermal, wind, hydro, biomass, and solar energy. In the future, International Bills Finance will continue to pursue leadership roles and participation in syndicated financing as well as develop loans and credit services within the green energy industry, leading Taiwan's transition to a low-carbon economy and fostering a positive social impact.

公司簡介

工研院是國際級應用研究機構，擁有六千名研發尖兵，致力於科技研發，推動產業發展，創造經濟價值，提升社會福祉為任務。自1973年成立以來，工研院率先投入積體電路研發，並孕育新興科技產業，累積超過三萬件專利，並新創及育成，包括台積電、聯電、台灣光罩、晶元光電等上市櫃公司，帶動產業發展浪潮。在永續環境方面，工研院發展「循環經濟」、「低碳製造」、「綠能系統與環境科技」等三大領域技術，深耕產業永續轉型與先進環境科技等重點項目，將能資源耗用對環境排放的衝擊極小化，建立淨零永續社會與產業發展共榮的生態體系。

產品介紹

工研院運用經濟部技術司科專資源，為電動車、碳捕獲及再利用、民生紡織循環等領域，研發獨特減碳解決方案：

1. 電動車 (混合電力控制器、超高功率密度碳化矽馬達驅動器、AI 智慧充電監控模組、大面積動力型燃料電池短電堆、雷射銲接電池模組技術等)：強化電動運具零件功率與智慧充電效能，提供更高效的低碳運輸解決方案。
2. 碳捕捉再利用 (新一代固碳PC的「二氧化碳捕獲及再利用技術」)：建立新型二氧化碳吸收劑配方，由產業製程煙道氣分離並捕獲其中的二氧化碳，再經由創新製程整合工廠餘熱和再生能源，有效降低二氧化碳捕獲能耗與成本，並將所捕獲的二氧化碳轉化為有用的化學品/燃料，擴大減碳效果。
3. 民生紡織循環 (聚酯織物深層脫色技術、織物回收用纖維智慧分選技術)：利用數位智慧技術建立紡織再生資源循環鏈，減少生態廢棄物碳排放。

2. 鋁模板摩擦攪拌銲接技術：國內建築模板以木模板為主，透過低耗能摩擦攪拌銲接完成鋁模板開發，使用次數提升至300次且可回收再利用。
3. 真空減碳熱處理整合技術：透過高溫持溫段整合併一次淬火完成模具及其製品要求之品質，可協助熱處理製程縮時及減碳。

Metal Industries Research & Development Centre

Company Telephone : +886-7-3513121

Company Website : www.mirdc.org.tw

Company Summary

MIRDC is the only research institution headquartered in Southern Taiwan. It has currently 11 bases in 6 counties and cities. As MIRDC mainly serves the metal and related industries, which makes the organization become one of the few legal R&D entities that provide systematic, integrated and comprehensive service (manufacturing processes, equipment, systems, management, computerization, inspections, training, market surveys).

The organization also owns 1,000 valid patents. It has published nearly 30,000 professional publications on metals, guided and assisted 1,258 companies annually over the last year, cultivated 17,219 personnel in the industries, and tested, certified, assistance of product development, technology& management services 17,976 cases.

Product Summary

1. Industrial Hydrogen and Natural gas mixed-combustion Applied Technology: Develop 25% and 50% hydrogen and natural gas mixed combustion burners and industrial furnace integration application technologies and establishes burner efficiency and safety verification capabilities.
2. Aluminum Formwork Friction Stir Welding Technology: In domestic construction, wooden formwork is predominantly used. The development of aluminum formwork has been achieved through friction stir welding. This technique allows the aluminum formwork to be used up to 300 times and is recyclable for further utilization.
3. Energy-saving Heat Treatment-vacuum Carbon Reduction Heat Treatment Integrated System: Through the integration of high-temperature holding sections and one-time quenching, can achieve the required quality of molds and products, which can help shorten the time of the heat treatment process and reduce carbon.

TTRI 財團法人紡織產業綜合研究所
Taiwan Textile Research Institute 

公司簡介

紡織產業綜合研究所成立於1959年，具備完整的紡織全領域研發設施與能量，並提供檢驗證、產業資訊與人才培訓等服務，為台灣與全球唯一專業紡織研發機構，近年來，積極投入高階紡織、數位創新與環保永續等三大研發方向，專利獲證數累計超過1,200件及每年業務合作超過24,000廠次以及榮獲全球百大科技研發獎(R&D 100)、愛迪生獎以及iF等國際獎項。

產品介紹

為因應近年全球永續環保發展趨勢，在經濟部產業技術司的支持下，紡織所投入相關議題研發；本次展示聚酯氧化分離回收、回收聚酯再生纖維、精準機能噴塗面料、紡織品微纖脫落量檢驗證等4項技術，藉由庫存餘布或消費後紡織品再製成紡織原料並完成終製品等循環迴圈過程，展現各項技術所扮演的角色及對環境在減碳效益所做出的貢獻。

公司簡介

國立臺灣海洋大學配合國家「海洋白皮書」與「綠能」政策，培育國家重要海洋專業人才，包含離岸風電之海事工程、智慧航輪、船長、AI應用、食科與食安、生技醫療、海洋環境保育、高科技生科與養殖等特殊專業人才。

基於海大過去既有的教學與研究成果，未來將秉持「頂尖海大建造工程」的十大願景與理念，帶領著全校師生跟行政團隊，對內持續精進教學方法與創新、促進校園和諧並落實大學社會責任；對外則是擴大爭取外部的資源，提升關鍵技術研發並展現本校特色研究成果、強化產學合作的質與量、提升學校的國際競爭力及全球排名，為臺灣培育更多兼具國際視野及在地關懷的跨領域海洋專業人才！

產品介紹

透過海洋工程科技中心，海大成功建置了河海大數據與整合型系統平台，同時研發人工智慧演算創新技術，解決臺灣在「離岸風電與海洋能源」以及「河海災防」的實務問題。本校海洋中心在跨領域技術上也有所突破，致力於研究海洋生態保育、海水養殖創新科技與永續海洋等領域，旨在實現淨零海洋生態。

智慧航運研究中心則以海洋觀測與智慧化技術研究為核心，推動國內沿岸海洋科技發展，同時提升對領海環境的管理水平。透過大學社會責任實踐計畫，海大積極推動人才培育、國際連結等方面，將學術研究轉化為實際社會影響，以推動淨零城市的可持續發展，追求國際接軌。

Company Summary

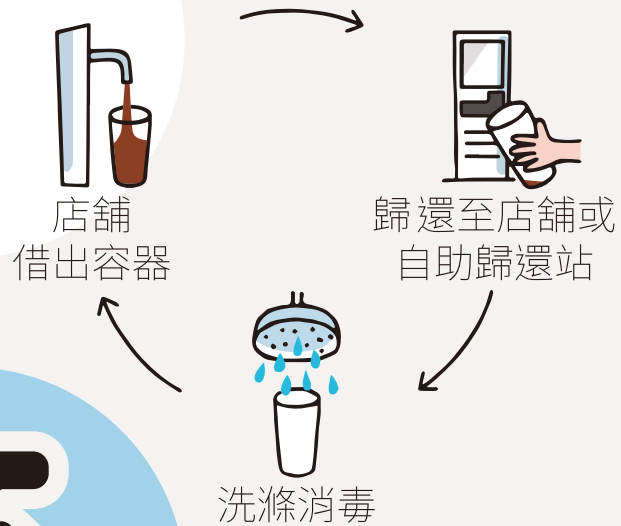

In accordance with national policies, National Ocean Policy White Paper and Green Energy, NTOU develops special professionals and high-paying talents. These talents include off-shore wind power marine engineering, smart ships, captains, AI applications, food science, marine environment conservation, high-tech biotechnology, biomedicine and aquaculture.

Building upon the school's past teaching and research achievements, I am going to adopt a pragmatic approach based on my background in construction engineering to lead the NTOU with the goal of constructing the best NTOU. First, I will continue to promote teaching excellence and innovation, create understanding and harmony on campus, and implement social responsibilities. Second, I will create more new resources. The results of key-featured research will be used to strengthen and encourage more industry-university cooperation and to enhance national competitiveness and world university rankings. By fulfilling these goals, we are going to develop more cross-disciplinary marine professionals who share both local and international perspectives for Taiwan.

Product Summary

Through the Center of Excellence for Ocean Engineering, a successful establishment of a comprehensive big data and integration platform for river and ocean has been achieved. Simultaneously, innovative artificial intelligence algorithms have been developed to address practical issues in Taiwan related to "offshore wind power and marine energy" as well as "river and ocean disaster prevention." Center of Excellence for the Oceans has made breakthroughs in interdisciplinary technologies, focusing on research areas such as marine ecology conservation, innovative technologies for marine aquaculture, and sustainable oceans. The aim is to realize a clean and sustainable marine ecosystem.

Company Summary

B5G Network Intelligently Connects Everything, Opening Infinite Possibilities - Empowering the Future with Wave-In Communication

Founded in 2014, Wave-In Communication provides customized end-to-end Private 5G and AIoT solutions for both public and private sectors, including Yang Ming Marine Transport Corp., Taipei Metro, Hsinchu City Fire Department, Chunghwa Telecom, and PEGATRON. Unlike traditional system integrators, Wave-In Communication not only collaborates with global leaders in B5G technology but also possesses in-house research and development capabilities. We innovate by developing communication devices and primarily focus on software-driven B5G AIoT system integration and consultancy, aiming to design, plan, and deliver tailored services.

Product Summary

This solution, named "Mission Critical Network," is designed to provide enterprises, rescue teams, defense and security organizations, and more with intelligent applications utilizing 5G private networks, mobile satellite communication, drones, and other technologies. It addresses challenges such as remote inspections, equipment patrols, major disaster relief, and national security needs. With its rapid and efficient deployment capabilities and high mobility, the solution is capable of offering a stable, high-speed, and secure private network in situations where communication stability is severely compromised due to difficulties in reaching locations, numerous devices, extreme disasters, or tense regional conditions. This ensures the secure and reliable transmission of critical information.

Company Summary

CRAM has focused on PCR materials for 30 years. As a pioneer in the circular economy, we are committed to integrating green supply chains and customizing the development of 'recycled materials' and 'low-carbon products' for clients with ESG sustainability needs. We offer comprehensive green solutions aimed at reducing waste, promoting recycling, and aiding companies in creating a net-zero world.

Product Summary

Our recycled materials have obtained the Green Material Certification (ISO14021) from TÜV Rheinland since 2011. Including 6 types of plastics (ABS, PC, PPO, PC/ABS, PP, PS), aluminum (6000 Series、ADC Series), and copper. Approximately 80,000 metric tons of plastic are rejuvenated in our factories annually, with carbon emissions reduced to only one-tenth of those generated by manufacturing new materials (PCR 100%). Since 2017, some materials have also been gradually passing the TÜV Rheinland Carbon Footprint Verification (ISO14067). We aim to further invest in low-carbon materials and product development in collaboration with our customers, working towards ESG sustainable practices for the future.

公司簡介

銘安科技股份有限公司(Minima Technology Co., Ltd.)成立於2003年，是亞洲地區，包含：日本、臺灣、韓國等，最早擁有生物可分解(可堆肥)產品認證的製造廠之一。本公司創辦人，黃建銘博士，是中華民國生物可分解材料協會創會理事長，曾任美國BPI生物可分解材料協會理事，目前為泛太平洋區生物可分解塑膠協會聯盟(PPBA)主席，及泰國生物可分解塑膠協會(TBIA)顧問；黃創辦人在學術與產業上，一直是居於領導的地位，同時也協助許多廠商開發、製造符合各國環保法令且實用的生活用品。

產品介紹

本公司主力開發可生物可分解(可堆肥)的複合材料，且可在堆肥設施中完全生物分解。本公司各系列樹脂是以源自天然植物的可生物分解(可堆肥)熱塑性塑料，如：聚乳酸(PLA)、聚丁二酸丁二醇酯樹脂(PBS)和聚己二酸對苯二甲酸丁二醇酯(PBAT)等各種可生物可分解(可堆肥)聚合物，開發出具有一定機械強度且柔韌的複合材料。這類材料適用於擠出、發泡、射出、吸塑與射出成型等加工成型，廣泛製造許多民生用品，如：吸管、容器、餐具、各式包裝、膜袋等。

Minima Technology Co., Ltd.

Company Telephone：+886-5-636-2899

Company Website：www.minima.com

Company Summary

Minima Technology Co., Ltd. was established in 2003. It is one of the earliest manufacturers in Asia, including Japan, Taiwan, South Korea, etc., to have biodegradable (compostable) product certification. The founder of our company, Dr. Chien-Ming Huang, is the founding chairman of the Environmentally Biodegradable Plastics Association (EBPA) of Taiwan (ROC), and once served as a director of the Biodegradable Plastics Institute (BPI) of the United States. He currently serves as the chairman of the Pan-Pacific Bio-Plastics Alliance (PPBA) and an advisor to the Thai Bioplastics Industry Association (TBIA) of the Thailand. Dr. Huang has always been in a leadership position in both academic and industrial fields. He has also assisted many manufacturers in developing and manufacturing practical daily necessities that comply with environmental protection laws of various countries.

Product Summary

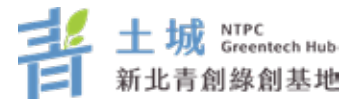

The company focuses on developing biodegradable (compostable) composite materials that can be completely biodegraded in composting facilities. The various series of resins in our company are based on biodegradable (compostable) thermoplastics derived from natural plants, such as polylactic acid (PLA), polybutylene succinate resin (PBS) and polybutylene adipate terephthalate (PBAT), etc., have been used to develop composite materials with certain mechanical strength and flexibility. This type of material is suitable for processing and molding such as extrusion, foaming, injection, thermoforming, laminating, etc., and is widely used in the manufacture of many household products, such as straws, containers, tableware, various packaging, film bags, etc.

Company Telephone：+886-2-22656081

Company Website：<https://www.facebook.com/ntpcgreentechhub>

Company Summary

The international promotion of ESG trends and the challenges associated with achieving net-zero carbon emissions in industries have created numerous opportunities for green innovation and entrepreneurship. The New Taipei City Government Youth Department and Ming Chuan University's Innovation Incubation Center have partnered to establish the Tucheng Greentech Hub. This initiative aims to recruit and incubate startup teams with a strong focus on green innovation, including areas such as green energy reduction, environmental sustainability, and the circular economy. The hub offers valuable resources, including office space, mentorship, and entrepreneurship courses, to support startup teams in market validation, fostering business collaborations, securing funding, and accelerating their business development. This effort contributes to the revitalization and growth of the green and sustainable innovation industries.

Product Summary

Goals of the Tucheng Greentech Hub:

1. Focus on guiding digital transformation and green energy carbon reduction startups, discovering promising startup teams for incubation, and assisting traditional industries in their green digital transformation efforts.
2. Build a distinctive local youth entrepreneurship platform, creating an innovative entrepreneurial environment for young people to share and for businesses to practice, becoming a platform for exchanges in distinctive industrial startups.
3. Facilitate fund and resource connections, link cross-domain expert resources, introduce venture capital, angel investments, fundraising, and government resources to enhance the resilience of startups, assisting young entrepreneurs in connecting with funding and resources.
4. Provide guidance for innovative technologies to enter the market, connect with large enterprises and industry chains, assist in technology implementation, field verification, and promote practical applications, helping innovative technologies penetrate the market.

公司簡介

成立於 2006 年，輝能科技是一家專注於次世代電池研發及製造的能源創新公司，專為電動車、消費市場、工業應用提供次世代電池解決方案。其獨家技術涵蓋超過710件全球專利（含申請中及已獲證）。輝能科技已與Mercedes-Benz, Vinfast等電動車領導品牌成為策略夥伴，並提供近8千顆由全自動試產線生產之固態電池樣品，供全球車廠測試及開發模組，商業化進度領先國際。輝能科技首條坐落於桃園科學園區的Giga級量產示範線於2024年開始供貨，將有助於加速全球主要市場之產能擴張。同時，輝能在法國建立48GWh超級工廠的專案已正式列入法國政府「法國2030計畫」（France 2030），印證輝能科技與全球政府致力於發展節能交通方式的願景相符。

產品介紹

為驅動真正的潔淨交通，輝能推出全球首款「PCR次世代固態電池」，綜合運用固態電池獨有的各項優勢，創造兼顧性能、成本、資源循環性等三大市場需求的電動車儲能方案。「Performance性能」方面來自固態電池的安全性、電性效能及電池包設計優化；「Cost成本」方面則透過優化材料、提升生產效率、簡化製程及提高回收性，降低電池整體成本；「Resource資源循環」遵循低能源消耗、低碳排放量、低汙染的「3低」準則，重複使用材料並提高回收再利用率，實現最大程度的資源循環，致力於實現真正的潔淨能源。

ProLogium Technology Co., Ltd

Company Telephone：+886-3-4521991

Company Website：<https://prologium.com/>

Company Summary

Founded in 2006, ProLogium Technology is an energy innovation company dedicated to next-generation battery research, development, and manufacturing and specializes in providing battery solutions for electric vehicles, consumer markets, and industrial applications. With exclusive technologies, encompassing over 710 global patents (including both pending and granted patents), ProLogium Technology has strategically partnered with the leading electric vehicle makers, such as Mercedes-Benz and VinFast, and it has supplied nearly 8,000 solid-state battery samples produced by fully automated pilot production lines for global automotive manufacturers to test and develop battery modules, leading the way in commercialization progress on an international scales. ProLogium Technology's first Giga-scale production demonstration line, located in the Taoyuan Science Park, will start delivery in 2024, contributing to the acceleration of capacity expansion in major global markets. Simultaneously, ProLogium's project to establish a 48GWh Gigafactory in France has been officially incorporated into the "France 2030 Plan" by the French Government. This recognition underscores the alignment of ProLogium Technology's vision with the global commitment of governments to the development of energy-efficient transportation methods.

Product Summary

In its pursuit of advancing authentic clean transportation, ProLogium has introduced the world's first "PCR Next-Generation Solid-State Battery." This energy storage solution for electric vehicle integrates the distinctive advantages of solid-state batteries, with the goal of providing well-rounded solution that addresses three primary market requirements: performance, cost-effectiveness, and resource circularity. Regarding "Performance," it leverages the safety, electrochemical performance inherent in solid-state batteries and optimized battery pack designs. Concerning "Cost," the approach involves the optimization of materials, enhancement of production efficiency, simplification of processes, and improvement of recyclability to mitigate the overall cost of the battery. In the aspect of "Resource Circular Economy," the strategy adheres to the "3 Lows" criteria, which means low energy consumption, low carbon emissions and low pollution, promoting material reusability and increasing recycling rates to achieve the highest level of resource circulation. This commitment is directed toward the realization of a genuinely clean energy solution.

公司於2018年5月在屏東縣枋寮鄉屏南工業區建廠，主要業務以『循環經濟』為宗旨，推動「資源循環零廢棄」為策略，將回收之硬質合金還原成鎢、鈷金屬原料的公司。本公司透過廢熱回收、節水製程以達到淨零碳排及資源循環再利用，並於2023年已取得UL2809 與 BS8001 認證，以環保的方式實行資源永續循環、企業永續經營。

產品介紹

鎢酸鹽: 鎢是地球上最耐熱、最耐磨、最硬的金屬。主要用於生產切削刀具、超硬模具，為汽車生產、航空航太和船舶工業的零件。其他領域包括採礦、建築、化學和電子工業。

鈷: 鈷常用於碳化鎢、充電電池、陶瓷著色劑、微量元素肥料和催化劑。

Lianyou Metals Co., Ltd.

Company Website : www.lianyoucorp.com

Company Summary

The company was established in Pingnan Industrial Park, Fangliao Township, Pingtung County in May 2018. Our main business is the production of tungsten and cobalt metals from recycled hard metal alloys under the circular economy with the global goal of net zero in mind. We recycle cemented carbide into tungsten and cobalt metals. Our company achieves carbon emissions reduction and resources conservation through heat recovery and water-saving technology, and has obtained UL2809 and BS8001 certification in 2023, realizing sustainable recycling of precious resources in an eco-friendly way.

Product Summary

Tungstate: Tungsten is the most heat resistant, abrasion-resistant, and hardest metal on earth. It is mainly used to produce cutting tools, super-hard molds to produce parts for the automotive, aerospace and shipbuilding industry. Other areas are in mining, construction, chemical and electronics industry.

Cobalt: Cobalt is commonly used in tungsten carbide, rechargeable batteries, ceramic colorants, trace element fertilizers and catalysts.

nextDrive

公司簡介

NextDrive (聯齊科技股份有限公司)，成立於2013年，長期專注能源物聯網技術，以數據為核心，透過分散式能源管理，提供軟、硬體整合及雲端解決方案，串接用電、產電、儲電裝置，為產業推進淨零轉型之進程，實現「善用每一度電」願景，邁向世界 2050 年淨零碳目標。

2017年進軍日本，與日本前五大的東京電力及中部電力均有合作關係。2023 年，NextDrive 榮獲日本經產省頒布之「年度新能源大賞會長獎」，同年再獲頒台灣國發會之新創領頭羊「Next Big」獎項，其技術前瞻性與影響力獲台日政府與業界肯定。

產品介紹

需量預測型 AI，表後儲能新解方，人工智慧驅動，勝過傳統儲能成效 15%：

有別於業界固定排程、負載追隨的調控模式，NextDrive 聯齊科技透過需量預測型 AI 演算法，預測場域用電型態、太陽能餘電與契約容量超約可能進一步動態調整儲能充放電排程。

- AI 智慧光+儲方案:有別於業界負載追隨為主的儲能調控方式,NextDrive 透過需量預測型 AI 預測場域電力型態。當預測有太陽能餘電,AI 提前調度蓄電池放電,並在餘電發生時充電,進一步提高綠電使用佔比。
- 多據點能源管理:彙整集團各時段、各區域用發儲電力數據,基礎能源管理搭配集團管理模組,第一步建立各營業據點能源管理,以集團角度了解整體用電型態。
- 智慧電表 Route B 軟硬體合作與 API 服務:台灣唯一通過台電 Route B 符合性測試的合作廠商。可直接安裝於台電智慧電表內取得電力數據。免去繁瑣的安裝問題與表計硬體成本。

Company Website：<https://pmuc.or.th/en>

Company Summary

Program Management Unit for Competitiveness (PMUC) is a research funding unit that operates under the legal framework of the Office of National Higher Education Science Research and Innovation Policy Council (NXPO). The role of PMUC is to manage the research and innovation fund which aims at enhancing the national competitiveness by creating innovations. This government investment enables industries to develop high-value goods and services to enter the global market, facilitating collaboration between the public and private sectors in Thailand and from abroad, and encouraging joint investment from firms, ranging from SMEs to large corporates. The seven industrial sectors of focus are:

1. Digital Platform, 2. Functional ingredient and High Valued Agricultural Products and Health Foods, 3. Health and Medicine
4. Bioenergy, Biochemical and Biomaterials, 5. BCG for Creative Tourism, 6. Circular Economy of Thailand
7. Future Mobility, Robotics and Automation

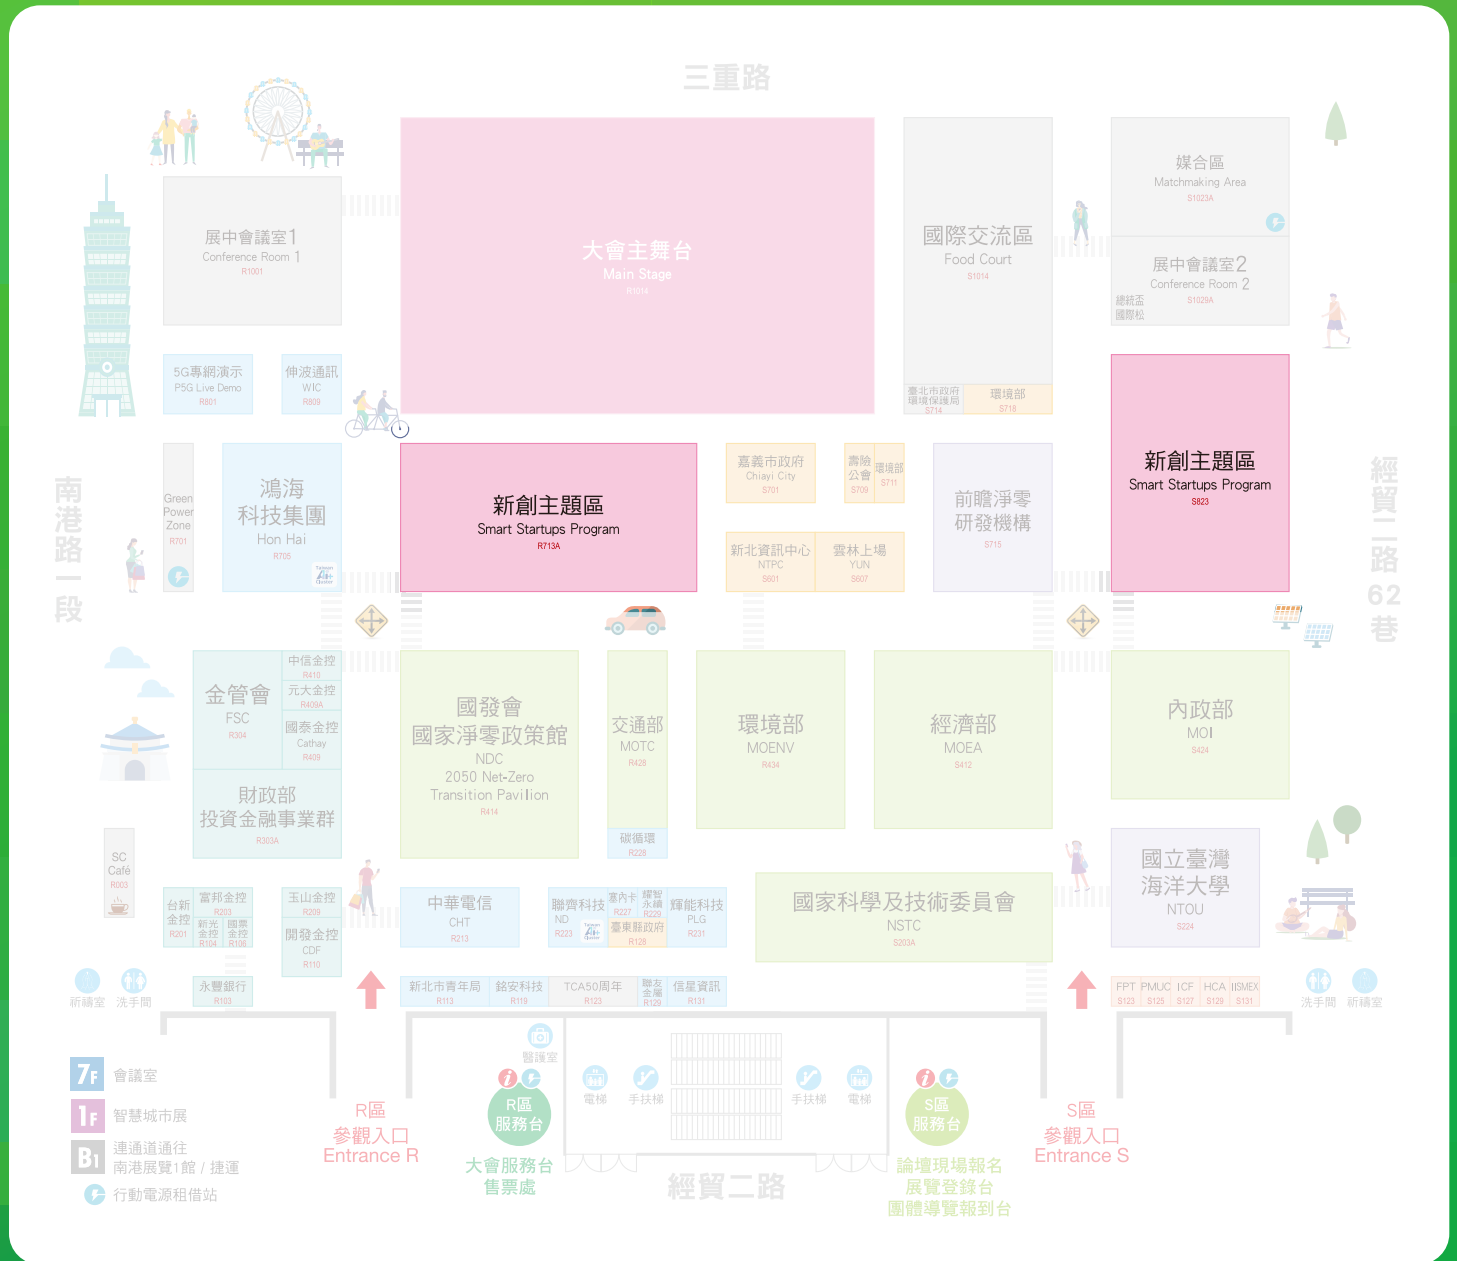

Product Summary

Regarding the working principles of the Digital Platform project of PMUC, we aim to promote digital innovation products/services at the global level. The four achievements of AI platforms developed by Thai researchers under PMUC's funding support are selected to join the event showcased.

1. Kin-Yoo-Dee Platform by Burapha University: A comprehensive health and medical platform, which includes Personal Care & Family Care, Community & Corporate Health Check-ups (off-site health check-ups), Virtual Clinic & Telemedicine, and 24/7 Care Center Operation.
2. Waijung Software by Aimagin Co.,Ltd: A model-based design embedded system development platform that automatically generates C code from Simulink model files, compiles, and downloads the executable files to Espressif ESP32 and Xilinx Zynq-7000 targets.
3. ZTRUS OCR system by Accomate Co., Ltd.: A software solution that aims to provide automatic data entry service with OCR (Optical Character Recognition) and AI-based cognitive templates designed for various types of documents.
4. eNose by MUI Robotics Co., Ltd: eNose is a versatile and reliable tool, facilitating early detection of potential issues such as spoilage, or contamination. Its adaptability makes it a crucial asset for quality control processes in manufacturing, ensuring compliance with stringent standards.

About the Qualcomm® Innovate in Taiwan Challenge

As the on-device AI leader, the innovative spirit has always been a part of Qualcomm's DNA. Building upon Qualcomm's longstanding collaboration with Taiwan's ICT ecosystems, QITC was started in 2019 to support Taiwanese startups by providing professional technical support and resources, and to encourage them to develop innovative solutions by using Qualcomm's diversified platforms. By holding the Challenge, Taiwan's innovative ideas can be integrated with global resources to further propel Taiwan's information and communication technology industry and startup ecosystem.

With this program we offer a comprehensive incubation program, including the access to Qualcomm technology, business coaching, IP training, as well as financial grants, and encourage startups' protection of inventions through patent filing.

With AI becoming almost everywhere and computing demands rapidly increasing, we hope that startup teams apply for QITC and invest in the R&D of AI PC and edge AI to create AI solutions on PC computing and IoT and further meet the demand of all kinds of innovative applications in the fields of Windows PC, drones and robotics, smart cities, and more. This jointly fuels innovative energy to revolutionize the application of new technologies amid the market boom of AI.
